## What is this product?

### Type:

This product is a UCITS Fund.

### Term:

Open Ended Fund.

### Objectives:

In accordance with the general investment objective of the Fund, the investment objective of the Sub-Fund is to produce returns comprising capital growth over the long term through investment primarily in equity securities in China.

**Benchmark:** MSCI China All Share Index

The benchmark is a comparator against which the Fund's performance can be measured. The index has been chosen as the Fund's benchmark as it best reflects the scope of the Fund's investment policy. The benchmark is used solely to measure the Fund's performance and does not constrain the Fund's portfolio construction.

The Fund is actively managed. The Investment Manager has complete freedom in choosing which investments to buy, hold and sell in the Fund. The Fund's holdings may deviate significantly from the benchmark's constituents.

The benchmark is shown in the share class currency.

### Investment Policy:

The Sub-Fund is actively managed. This means the Investment Manager is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this will include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market.

The Sub-Fund seeks to achieve its objective primarily through investment in a diversified portfolio of equity securities of, or depositary receipts representing the shares of Chinese companies which are listed, traded or quoted on regulated markets worldwide with the aim of seeking exposure to growth investments over the long term. These investments include China A shares and transactions through Stock Connect. Chinese companies are companies that have their headquarters or a significant part of their

operations in China. The Sub-Fund may also invest up to 10% of its net assets in cash and cash equivalents as well as other liquid financial assets, including inter alia bank deposits, time deposits, liquid money market instruments or investment grade debt securities issued by governments or supra-national organizations, and shares/units of money market funds, for distribution, redemption and for cash management purposes consistent with the investment objective and investment policy of the Sub-Fund. The Sub-Fund may, under exceptional circumstances (for example in an uncertain market environment), hold cash or cash equivalent in excess of 10%.

If the Investment Manager believes it to be beneficial to the Sub-Fund, some limited exposure to transferable securities other than Chinese companies may be undertaken up to 10% of its net asset value.

The Sub-Fund will have exposure to permissible People's Republic of China ("PRC") shares directly via the Stock Connect and/or through the FII Scheme or indirectly via investments in eligible undertakings for collective investment that invest primarily in permissible PRC shares and similar financial instruments where the underlying assets consist of securities issued by companies quoted on regulated markets in China, and/or the performance of which is linked to the performance of securities issued by companies quoted on regulated markets in China and/or securities issued by companies which in the Investment Manager's opinion have significant assets, business, production activities, trading or other business interests in China or the majority of whose value or income is linked to their Chinese business.

The Sub-Fund will not invest more than 10% of its net assets in units or shares of a single eligible undertakings for collective investment (including exchange trading funds).

The Sub-Fund may use exchange-traded financial derivative instruments for efficient portfolio management purposes (including hedging).

The Sub-Fund will not invest in OTC derivatives.

### Intended retail investor:

This product is intended for investors who are prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments.

## What are the risks and what could I get in return?

### Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: EUR 10,000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	106 EUR	732 EUR
<b>Annual cost impact (*)</b>	1.1%	1.1%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.9% before costs and 7.8% after costs.
